DETAILED ACTION

Response to Arguments

Applicant's arguments, see pages 14-17, filed 1/31/2006, with respect to rejections of independent claims 1 and 16 have been fully considered and are persuasive. The rejections of independent claims 1 and 16 have been withdrawn.

Claim Rejections - 35 USC § 112

Claims 1-3, 5, 7, 10, 14, 30, and 16-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

As to claims 1-3, 5, 7, 10, 14, 30, and 16-31, the newly added limitation "the information symbols convey data, and the modulation indices convey additional information in addition to and distinct from the data" is not supported by specification as originally filed. After reviewing the citations of page 3, lines 11-22 and page 4, lines 1-12 and claim 23 that was not in the originally filed application (Pg. 11, Lines 8-17 of remarks), it is unclear that the additional information is distinct from the data since page 3, lines 11-15 simply states "As well as the coded data words, additional control signals can also be transmitted directly by a carrier wave." No information regarding the format

or content of these additional control signals is provided to show the additional information is, in fact, distinct from the data.

Allowable Subject Matter

Claim 13 is allowed. The following is a statement of reasons for the indication of allowable subject matter:

As to claim 13, the prior art of record fails to teach a method of transmitting a plurality of information symbols by assigning differing modulation indices to a plurality of information symbols, wherein the modulation index of the control signal is smaller than the modulation index of a data signal formed by others of the information symbols.
